Additional Information for California Consumers This section provides additional disclosures required by the California Consumer Privacy Act (CCPA).

Authority (78.3%):

California consumers can also designate an authorized agent to exercise these rights on their behalf, but we will require proof that the person is authorized to act on their behalf and may also still ask them to verify their identity with us directly.

Non-Personal Data (81.1%), Processing (98.8%), Technical Measure (80.9%):

In-app Tracking Technologies When we refer to tracking technology/technologies in this Policy, we mean any technology that stores or accesses information on the users device, including SDKs, tracking pixel, HTML5 local storage, local shared object, and fingerprinting technique.

Technical Measure (97.0%):

Tracking technologies are usually classified by purpose (Technical, Analytics, Profiling) or by publisher (First-party, Third-party).

Legal Basis (77.8%):

This classification is important because different legal requirements apply based on how the tracking technologies are classified.

Processing (95.1%), Required Purpose (85.5%), Technical Measure (98.3%):

By purpose Technical tracking technologies Technical tracking technologies are used for the purpose of transmitting messages over an electronic communication network or to provide a service specifically requested by the user.

Required Purpose (94.4%), Technical Measure (97.4%):

Thus, technical tracking technologies are essential for the correct functioning of the app and to provide the service offered to and requested by the user.

Non-Personal Data (74.6%), Required Purpose (98.2%):

For example, technical tracking technologies can be used to monitor sessions, store specific server access information related to the user configuration, facilitate the use of online content, or keep track of items in a shopping cart or information used to fill in a form.

Required Purpose (92.8%):

Analytics tracking technologies Analytics tracking technologies may be used to assess the effectiveness of an information society service provided by a publisher, evaluate and improve the design of an app, or help measure its traffic.

Non-Personal Data (92.4%), Personal Data (97.2%), Processing (96.2%), Required Purpose (94.5%):

In other words, analytics tracking technologies may be used to track the traffic and performance of an app, by collecting aggregate data on the number of users and how they interact with the app to improve its services.

Non-Personal Data (88.9%):

For example, analytics tracking technologies may collect information about how users access an app, including the number of users, possibly grouped by geographical area, time slot, how long users stay on the app, what parts of the app they interact with, or the number of users who used a

particular feature.

Consent (90.3%):

Analytics tracking technologies need your explicit consent.

Processing (67.5%), Technical Measure (92.2%):

However, analytics tracking technologies are equated to technical trackers and, thus, do not need your consent if: they are only used to produce aggregated statistics that are performed by way of the controllers own resources and do not turn into activities that go beyond statistical counting and enable business-related decision-making; or the third parties do not match the analytics trackers' data with any other information and do not forward such data to other third parties.

Required Purpose (90.4%):

Profiling tracking technologies Profiling tracking technologies may be used to evaluate certain personal aspects relating to users and trace specific actions or recurring behavioral patterns in the use of the offered functionalities back to specific, identified or identifiable individuals for the purpose of grouping them within homogeneous, multi-sized clusters.

Required Purpose (94.0%):

This is aimed to enable the company to analyze and predict personal aspects concerning the users, provide them with increasingly customized services beyond what is strictly necessary for the delivery of the service, and also send targeted advertising messages in line with the preferences expressed by the user during their in-app activities.

Required Purpose (98.4%):

In other words, profiling tracking technologies may be used to convey behavioral advertising, measure the effectiveness of ads, or to customize the services offered in line with the users monitored behavior.

Required Purpose (97.0%):

For example, profiling tracking technologies can be used to create user profiles and offer content in line with the users interests, send targeted ads or messages, conduct statistical analysis or other research activities to improve our products and services and measure the effectiveness of our campaigns.

Required Purpose (77.7%):

Third-party Firebase is a tool provided by Google which is essential for the app to correctly interact with the backend and provide the user with the key features.

Required Purpose (67.5%):
