Data Controller (86.1%), Technical Measure (98.5%):

Google Analytics Though we don't store any personal information.

Third Party (90.4%):

apps may contain APIs from third parties.

Required Purpose (98.8%):

Specifically, our mobile games which use Google Analytics to help analyse how users behave in the game.

Non-Personal Data (82.4%):

We mainly look out for how long users have spent in the game and how many levels were played.

Processing (84.2%), Required Purpose (96.9%):

This information is then used to evaluate use of our game and to improve the usability.

Processing (97.0%):

All information collected via the Google Analytics API is anonymous.

Data Subject (65.9%), Third Party (98.2%):

The advertisements are provided by third party companies and they may use and collect anonymous data about the User's interests to be able to select more relevant advertisements.

Personal Data (94.5%):

This information may also include location data and unique device identifier.

Non-Personal Data (60.3%), Required Purpose (80.9%):

Admob policy: <http://www.google.com/intl/en/policies/privacy/> We display internal advertisements which advertise other i6 games which we feel players will be interested in; in order to provide the best scope of advertisements we use data listing all installed applications on your device allowing us to filter out games already installed.

Processing (92.5%):

We cache images used for internal advertisements by storing them in the application root directory allowing us to re-display advertisements without needing to download them again keeping data

usage to a minimum.
