Personally Identifiable Information Chimbori Apps do not collect any personal or personally-identifiable information for the purposes for advertising, tracking, or monetization without your explicit consent.

Processing (97.7%):

If you willingly share any information with us (e.g.

Right (82.7%):

by sending us bug reports), you grant us the right to use it to make your experience with Chimbori Apps better for you.

Authority (64.4%), Automated Decision Making (68.0%):

Automatic crash telemetry has been the best solution to the problem so far, as this relieves the burden of manual reporting from users, while capturing the hardware and software state at the time of crash.

Automated Decision Making (95.0%), Data Controller (88.9%), Processing (98.7%):

When an App crashes because of a programming error or unexpected issues with a specific device, information related to that crash is automatically captured and shared with us.

Required Purpose (99.1%):

This enables us to diagnose and fix the error(s) in the next version so you can have a better experience.

Non-Personal Data (87.6%), Processing (61.2%):

No personal information: As part of crash reports, device-specific information (such as your

hardware model, operating system version, and mobile network information) may be shared with us.

Personal Data (71.6%), Processing (97.8%), Third Party (73.6%):

Third-party tools & services: As a required condition of making our Apps available on Google Play or Apple App Store, those companies capture basic crash report information and relay it to us.

Data Processor (72.8%), Processing (99.6%), Required Purpose (94.7%), Third Party (77.8%):

In addition, we also employ commercially available services as data processing partners to gain advanced insights into crash reports.

Required Purpose (75.5%):

App Health and Performance Ensuring the highest degree of app performance on all devices is a critical priority for us.

Non-Personal Data (89.6%), Processing (86.0%), Required Purpose (99.3%):

To understand when certain features are slow on certain devices, we need to collect and record performance metrics from each device to be able to compare and analyze it.

Non-Personal Data (79.0%), Processing (97.6%):

This performance data cannot be reliably measured in a laboratory it must be recorded on devices that are used by our users.

Processing (60.4%):

Because we constantly improve our apps based on the non-personalized anonymous crash reports and performance data we receive from you, you will see performance improvements & fewer crashes in all our apps over a period of time.

Processing (80.6%):

All data collection is completely anonymized and is analyzed in the aggregate.

Data Controller (96.3%):

We cannot track any individuals behavior or usage of our app based on this performance data alone.

Processing (96.3%):

Since we do not host our own servers, we rely on data processing partners to collect and display this data for us.

Data Source (83.4%), Required Purpose (97.4%):

We use the information we collect from all of our Apps and Services to provide, maintain, protect and improve them, to develop new ones, and to protect Chimbori and our users.

Processing (99.8%), Scale Non-EU (79.0%):

Chimbori processes information on servers in many countries around the world.

Organisational Measure (80.3%), Required Purpose (63.3%):

System Component Update Alerts To protect your device, our apps can alert you when critical system components (such as Android System WebView) are out of date.

Non-Personal Data (88.3%), Processing (99.5%), Required Purpose (79.8%):

To provide these alerts, the current installed version information is collected and will be included in any bug reports you send.
