Specific use of personal information regarding Mobile Applications (Apps) 4.1 Location data during the use of Apps Unlike many other apps on the market, we never send information like your location to a server, everything is processed on your device.

Processing (95.3%):

We've designed our weather apps so that the user's precise location remains on the phone and is converted into the nearest weather station ID.

Processing (96.9%):

What's more, weather requests linked to a station are not stored, so it's impossible to link a user to a weather request.

Automated Decision Making (94.2%), Technical Measure (61.9%):

Apps downloaded to your mobile phone or tablet may rely on location based services, such as your Global Positioning System GPS to inform you about forecasts regarding your current location automatically or upon demand.

Personal Data (95.6%):

The app may also find your location based on your address IP.

Personal Data (90.8%), Processing (92.5%):

Access logs are disabled on servers so your IP address isn't stored, logged or shared.

Personal Data (69.6%), Required Purpose (76.8%):

The data relating to your location is processed locally on your device in order to obtain a station ID.
